

LISTING OF CLAIMS:

Claims 1-14 (Canceled)

15. (Currently amended) ~~The~~ A laminate sheet windable into a roll, comprising:

a plurality of adhesive sheet portions having a predetermined form, formed from an adhesive sheet laminated on a long release sheet, and a protective member laminated on the long release sheet,

wherein said protective member is thicker than said adhesive sheet and is provided longitudinally on the long release sheet and spaced apart from said adhesive sheet portions so as not to overlap said adhesive sheet portions when said laminate sheet is wound longitudinally into a roll,

wherein said plurality of adhesive sheet portions are provided longitudinally and spaced lengthwise in a central portion of said release sheet, and said protective member is provided on both side portions of said release sheet in the direction of width of said release sheet,

wherein said adhesive sheet comprises a base material and an adhesive layer, the adhesive layer being disposed between the base material and the release sheet so that the release sheet is releasably adherent to the adhesive layer of the adhesive sheet portions,

wherein the base material and the adhesive layer are made of different materials~~according to claim 2,~~

wherein said adhesive sheet portions have a planar form that is ring shaped with a central hole-punch portion.

16. (Canceled)

17. (Previously presented) A laminate sheet windable into a roll, comprising:

a plurality of adhesive sheet portions having a predetermined form, formed from an adhesive sheet laminated on a long release sheet, the plurality of adhesive sheet portions being spaced lengthwise on the long release sheet, and a protective member laminated on the long release sheet,

wherein said protective member is thicker than said adhesive sheet and is provided longitudinally on the long release sheet, spaced apart from the adhesive sheet portions and shaped to intrude between the adhesive sheet portions so as to partially overlap said adhesive sheet in a radial direction of a roll when said laminate sheet is wound longitudinally into the roll,

wherein said adhesive sheet portions have a planar form that is ring shaped with a central hole-punch portion,

wherein said adhesive sheet comprises a base material and an adhesive layer, the adhesive layer being disposed between the base material and the release sheet so that the release sheet is releasably adherent to the adhesive layer of the adhesive sheet portions,

wherein the base material and the adhesive layer are made of different materials.

Claims 18-21 (Canceled)

22. (Currently amended) TheA laminate sheet windable into a roll, comprising: a plurality of adhesive sheet portions having a predetermined form, formed from an adhesive sheet laminated on a long release sheet, the plurality of adhesive sheet portions being spaced lengthwise on the long release sheet, and a protective member laminated on the long release sheet,

wherein said protective member is thicker than said adhesive sheet and is provided longitudinally on the long release sheet and spaced apart from said adhesive sheet portions so as not to overlap said adhesive sheet portions when said laminate sheet is wound longitudinally into a roll,

wherein said adhesive sheet comprises a base material constituted by a resin sheet, and an adhesive layer, the adhesive layer being disposed between the base material and the release sheet so that the release sheet is releasably adherent to the adhesive layer of the adhesive sheet portions,

wherein the base material and the adhesive layer are made of different materials~~according to claim 7,~~

wherein said adhesive sheet portions have a planar form that is ring shaped with a central hole-punch portion.

23. (Currently amended) TheA laminate sheet windable into a roll, comprising: a plurality of adhesive sheet portions having a predetermined form, formed from an adhesive sheet laminated on a long release sheet, the plurality of adhesive sheet portions being spaced lengthwise on the long release sheet, and a protective member laminated on the long release sheet,

wherein said protective member is thicker than said adhesive sheet and is provided longitudinally on the long release sheet and spaced apart from said adhesive sheet portions so as not to overlap said adhesive sheet portions when said laminate sheet is wound longitudinally into a roll,

wherein the adhesive sheet comprises a base material and an adhesive layer, the adhesive layer being in continuous contact with the long release sheet, the adhesive layer being disposed between the base material and the release sheet so that the release sheet is releasably adherent to the adhesive layer of the adhesive sheet portions,

wherein the base material and the adhesive layer are made of different materials according to claim 19,

wherein said adhesive sheet portions have a planar form that is ring shaped with a central hole-punch portion.

Claims 24-30 (Canceled)
